

CIRCULAR.

We are now running our new factory, which we claim is better adapted to the perfect and economical manufacture of Files than any other in this country, and are now guaranteeing our production to be equal in every particular to any first-class File. The result has been most satisfactory both to our patrons and ourselves.

The grounds upon which we thus warrant our Files to so high a standard are, that we are using the best grade of steel exclusively, that is known to the trade, and all the care that can be taken to make the very best Files is enforced in every department. We invite special examination of our Mill Saw Files, as having a deep tooth and hard, and the edges equally well cut with the sides, and of the Round Edged Files, and so in fact, as well as labeled so. All our Files are forged, not rolled, and are free from bunches and hollows, and we believe will average straighter than any File, English or American, in the market. They are inspected at every stage of the manufacture, and subjected to the most thorough tests. No File is suffered to leave the factory that is not perfect in every particular, and they are sent out with the guaranty that if not as we represent them, they may be returned to us at our expense, and we will refund the money.

We are monthly increasing our production, and we shall spare no efforts to fill promptly and with satisfaction all orders we may receive at the lowest rates for reliable goods.
